

## BFBS PACE Receiver - BFBS Tuning Guide

### ***IMPORTANT - Before the Satellite Dish is Re-Aligned.....***

...it is extremely important that you check that your BFBS Pace Receiver has received its software update before any work is done to re-align your satellite dish from the present Eutelsat W3A to the new Eutelsat W2A

**to check, carry out the following,**

1. Press Menu, press the Down Arrow to highlight System, and press OK

2. The following screen shall be displayed. Please check the Software Version

3. If you have **Release 18** then you can proceed and have the satellite dish re-aligned. Press Exit twice to return to the main TV screen. Following the dish being re-aligned to W2A continue at step 7

If you do not have Release 18 then you need to carry out the following procedure **before** the dish is re-aligned to W2A

4. Press Menu, then the Down Arrow until you have highlighted Reset, Press OK

The following screen will be displayed

5. Press the Red button halfway down the remote control, wait a couple of seconds and the satellite receiver will reset itself and this will initiate a software upgrade. During this procedure the screen will go blank for a couple of seconds
6. When the satellite receiver is working again check that the Software version is Release 18, by following steps 1 and 2

7. Following the dish being re-aligned to W2A and the BFBS Pace receiver being turned on, the following screen will display indicating that the satellite receiver cannot see a valid signal. This is correct.

8. Press Menu, then the Down Arrow until you have highlighted Reset, then press OK

9. The following screen will be displayed,

10. Press the Red button halfway down the remote control, wait a couple of seconds and the satellite receiver will reset itself. During this process the screen will go blank for a couple of seconds

11. The following screen will now be displayed, select your Country using the Right and Left buttons. Selecting your Country will allow the Electronic Program Guide (EPG) to display correctly

12. Press the Red button halfway down the remote control to start the network scan

13. The following screens will now be displayed,

and then the satellite receiver should show the BFBS channels that you are entitled to on the new satellite, and be operated normally
